Customer Number: 20277

Hiroshi KANNO

Confirmation Number: 4750

Application No.: 10/736,627

Group Art Unit: 2817

Filed: December 17, 2003

Examiner: Stephen E. Jones

For: TRANSMISSION LINE AND SEMICONDUCTOR INTEGRATED CIRCUIT DEVICE

LETTER

Mail Stop IF Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

Attached hereto is the English translation of the International Preliminary Examination Report, form PCT/IB/338 and form PCT/IPEA/409 for the examiners information.

Respectfully submitted,

McDERMOTT WILL & EMERY LLP

Michael E. Fogarty

Registration No. 36,139

Please recognize our Customer No. 20277 as our correspondence address.

From the INTERNATIONAL BUREAU

PCT

NOTIFICATION OF TRANSMITTAL OF COPIES OF TRANSLATION OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Rule 72.2)

To:

SUMIDA, Yoshihiro 3rd Fl., Bo-eki Bldg. 123-1, Higashi-machi Chuo-ku Kobe-shi, Hyogo 650-0031 JAPON

Date of mailing (day/month/year) 28 April 2005 (28.04.2005)	
Applicant's or agent's file reference 03P438WO / H & A	IMPORTANT NOTIFICATION
International application No. PCT/JP2003/009784	International filing date (day/month/year) 01 August 2003 (01.08.2003)

Applicant

MATSUSHITA ELECTRIC INDUSTRIAL CO., LTD. et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

AZ, CA, CH, CN, CO, EP, GH, KG, KP, KR, MK, MZ, RO, RU, TM

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, BA, BB, BG, BR, BY, BZ, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, ES, FI, GB, GD, GE, GM, HR, HU, ID, IL, IN, IS, JP, KE, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MN, MW, MX, NI, NO, NZ, OA, OM, PG, PH, PL, PT, SC, SD, SE, SG, SK, SL, SY, TJ, TN, TR, TT, TZ, UA, UG, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

International application No. PCT/JP 03/09784

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	9-11, 13-17	YES
		Claims	1-8, 12	NO
	Inventive step (IS)	Claims	9-11, 13	YES
		Claims	1-8, 12, 14-17	NO
	Industrial applicability (IA)	Claims	1-17	YES
		Claims		NO NO

2. Citations and explanations

Claims 1 to 8, 12

Document 1: JP 2002-171105 A (Sumitomo Metal (SMI)

Electronics Devices Inc.), 14 June 2002,

entire text, fig. 3, 5, 6, 17

Document 1 discloses a transmission line provided with a signal line (signal line (2)), a resistor layer (resistor (5)) facing the aforementioned signal line with a dielectric layer (dielectric substrate (1)) interposed therebetween, and conductors for grounding (ground planes (3)) which are electrically connected to the aforementioned resistor layer, and the electrical conductivity, material, and width of the resistor are merely features fittingly determined as needed at the discretion of a person skilled in the art.

Accordingly, a comparison of the invention described in claims 1 to 8 and 12 and the transmission line disclosed in document 1 reveals no particular difference in configuration, and thus, claims 1 to 8 and 12 lack novelty.

Claims 14 to 17

Document 2: JP 1-233812 A (Fujitsu Ltd.), 19 September 1989, entire text, all drawings

PCT/JP 03/09784

Document 2 discloses a semiconductor integrated circuit provided with a multi-stage high-frequency amplifier, wherein a bias circuit has a resistor (R3) and a capacitor (C6) shunt-connected in series on a bias line, and a person skilled in the art could easily conceive of constituting said bias circuit using the transmission line disclosed in document 1.

In the response to the written opinion, the applicant points out that document 1 makes no mention of the thickness of the dielectric substrate and discloses nothing pertaining to the occurrence of a capacitance between the signal line (2) and the resistor (5), and asserts that there are differences between the invention disclosed in document 1 and the invention of the present application, one being that the dielectric layer of the present invention is markedly thinner than the substrate, namely, 1 µm in embodiment 2 and 0.2 µm in embodiment 4, for example.

However, the only description in the claims of the present application pertaining to the thickness of a dielectric body is of "a dielectric layer," and thus, no comparison to the "dielectric substrate" disclosed in document 1 can be made using only this description.

Moreover, a person skilled in the art could easily apprehend that a capacitance could occur between the signal line (2) and the resistor (5) disclosed in document 1.

Accordingly, the assertions of the applicant in the response to the written opinion are not accepted.
